 Bacolod City, Philippines

SUMMARY

Versatile IT systems and solutions professional with a cross-functional background in systems and network administration, cybersecurity, physical security systems, and application development. Experience architecting infrastructure from the ground up, troubleshooting complex environments, building custom automation tools, and deploying enterprise platforms to support operational and business needs. Strong focus on system reliability, security, and continuous improvement in dynamic environments.

PROFESSIONAL EXPERIENCE

- LMI Corporation, Network and System Administrator** Jun 2025 – Present | Bacolod City, Philippines
- **Infrastructure & Systems:** Administered Windows, macOS, and Linux systems including Linux server management (user access, service uptime, and system health monitoring) while integrating endpoint protection and firewall solutions, and handling Level 2 escalations across internal and client-facing environments.
 - **Automation:** Designed and implemented automation workflows using Google App Script and Looker Studio, streamlining data processing and generating actionable reports for operations and management.
 - **Active Directory:** Set up and configured Active Directory on Windows Server 2022 with domain services, DHCP, DNS, OU structure, security groups, and GPOs for cross-platform (Windows and Linux) authentication and access control.
 - **ERP Administration:** Customized, configured, and implemented Odoo ERP modules, improving business workflows, data integrity, and cross-department visibility.
 - **Systems Integration:** Diagnosed and resolved data-pipeline defects in a Python ERP to reporting middleware integration, correcting inaccurate business metrics delivered to client-facing dashboards.
 - **Security Operations:** Investigated and resolved security incidents, monitored network traffic, and enforced security controls to maintain compliance and service integrity.
 - **Email Security:** Configured and deployed SPF, DKIM, and DMARC records to strengthen email authentication and prevent domain spoofing and phishing attacks.
 - **Physical Security & Systems Deployment:** Designed and installed wired access-control systems, including network topology planning, hardware/vendor evaluation, and cost breakdowns for internal and client offices; configured and administered a Hikvision HikCentral Professional deployment.
 - **Infrastructure Projects:** Supported the deployment of hyperconverged infrastructure (HCI) solutions across 4 client sites, performing functional testing to validate configuration and system readiness.

- LMI Corporation, IT Specialist** Aug 2024 – Jun 2025 | Bacolod City, Philippines
- **ERP & Service Management:** Administered and supported multiple Odoo ERP modules (Helpdesk, Field Service, Inventory, Purchasing, Sales, and CRM), focusing on user troubleshooting, access control management, and functional customization to ensure smooth daily operations.
 - **Internal Tooling:** Built internal Google App Script web forms with Sheets-backed data collection (IT Hardware Assessment, Hardware Performance & User Requirements Audit) to standardize IT asset intake and reporting.
 - **Web & Digital Systems:** Led website design optimization, and SEO initiatives, improving site architecture, usability, and organic search visibility.
 - **Technical Support & Operations:** Delivered tier 1 and tier 2 technical support across Windows, macOS, and Linux environments, ensuring reliable operation of company endpoints and systems.
 - **Cross-functional Collaboration:** Collaborated with Marketing and Operations teams to align IT infrastructure and digital platforms with business and growth initiatives.

EDUCATION

University of Saint La Salle, Bachelors of Science in Computer Science 2019 – 2023 | Bacolod City, Philippines

SKILLS

Systems & Network

Windows, macOS & Linux Administration, Linux Server Management, Active Directory (Windows Server 2022), Network Administration (Cisco Meraki), Firewalls & Switches (VLANs), Docker

Programming Languages

Python, C++, Java, Shell Scripting (Bash), HTML, CSS, JavaScript, TypeScript, React

Cybersecurity

Threat Analysis & Log Reviews, Security Controls & Compliance, Email Authentication (SPF/DKIM/DMARC)

ERP & Tools

Odoo ERP, Google AppScript, Looker Studio, Data Analysis & Presentation, Technical Documentation

Systems Design & Deployment

Network Topology Design, Hardware/Vendor Evaluation & Cost Analysis, Hikvision Server, Access Control, CCTV Systems

Professional

Problem Solving, Adaptability, Analytics, Attention to detail, Collaboration
